**Subject:** Town of Wallace - Notice of Regulatory Cleanup - Your Letter of December 21, 2012

Ginny,

Oh behalf of the Town of Wallace, I wanted to provide you an update on the Town's status of responding to your request for completion of a Site Cleanup Questionnaire in your letter of December 21, 2012. We have identified a Registered Environmental Consultant (REC) as included on your Branch list, have discussed the site with them, and have begun negotiations for scope, fee, and contract terms with that. Concurrent with our discussions with the REC, we have notified NCDOT Division of Aviation (DOA) of your Branch's request. DOA is being asked to confirm the reimbursability of fees associated with complying with your request in advance of starting the work since most airport work is reimbursed under state and federal grant programs administered by DOA. Getting DOA concurrence with reimbursability in advance of doing the work is needed such that we can make any needed language modifications in the REC contract if required by DOA.

I will continue to update you on the status of completing the questionnaire as we work through the various regulatory and funding authorities associated with work on the airport property.

Thank you.
